WHAT DO WE DO?

We deal with the wholesale of Polish books, board games, books for children and greeting cards. Our most important clients are Polish stores and wholesalers. Our offer includes over 100,000 products. We are able to import almost any item available in Polish bookstores, including the latest bestsellers just a few days after their Polish premieres.

WHERE DO WE DO IT?

Thanks to our own distribution network and cooperation with trusted logistics partners, we are able to deliver goods to any place in the UK.

HOW DO WE DO IT?

Regardless of the chosen model of cooperation, we guarantee returns of all products, of course, at the same prices for which they were purchased from us.

We recommend that the products reach the stores in 6-8 week cycles (5-7 deliveries per year). Such cycles allow regular portion of new publications at the time of the delivery, which is very important especially in the case of books.

PRICE

Each product in the offer has our company price tag. It includes the resale price for the customer, which includes the store's margin. Depending on the product group, the margin ranges from 20% (all items with tags above £ 5) to 40% (all items with tags below £2 as well as discounted and promotional products).

COOPERATION

We offer two models of cooperation - the commission model and the classic model. Whichever the customer chose **all the products are fully refundable**.

Commission model. The store pays the deposit returned at the end of cooperation. Thanks to that, he receives a display of his choice along with stocks adequate to its capacity.

Each payment is post-sale - the store pays for the products it sold. With each new delivery, our employee fills the entire display with new products, and all unsold products from the previous delivery are counted, scanned and collected by him as a return. The value of the returned products is refunded as a credit note to the previous invoice. All the documents are printed for the customer on site. The difference between the invoice and credit note is the balance to be paid.

In this model, determining the assortment and value of each delivery as well as resale prices is being done by our side.

Classic model. The store pays for each delivery in advance, as in standard trade. After payment, the products become the property of the store.

The store decides by itself of the amount, range and frequency of orders and returns. Store also gets a 5% discount on each order.

If the amount of the first delivery exceeds £350, the store can choose a free display stand from our range.

Returns of the products are being done as a credit note to one or more invoices. The value of the returned products are refund by us to the store in cash or by bank transfer, or being balanced with the new invoice amount if the store decides to get a new delivery.

The store places the orders itself, using our Excel form and has the option of setting resale prices at its own discretion..
